Order for time limited student license

I order the following programs to use them exclusively for my studies:

- RSTAB program family (framework structures)
- RFEM program family (finite elements)

I accept the following conditions:

The software may be used only for study purposes such as tutorials, lessons, seminar papers, student research projects, theses and dissertations. It is strictly forbidden to use the software for commercial purposes. Handing-over of the software to third parties is not allowed, even if it is on loan. Using the software is time limited to 6 months. On expiry of this period the student may extend the use of the software up to three times by a further period of 6 months. To apply for an extension of time, the student must submit a new, valid confirmation of enrollment of college, university or institution of higher education. By the end of the limited time period the student must return the dongle (hardlock). Questions for help may be send for free by fax or email. Manuals in printed form are not delivered (manuals in PDF file format are available for download at www.dlubal.com or can be called up in the program's help system). The student license will only be issued on submission of a confirmation of enrollment provided in **original form** and valid for the period of time during which the student wants to use the software, and a copy of the student's valid identity card or passport..

User fee including extensions of time:

The fee for using the software is a one-off fee of 100 € including sales tax (within European Union).

Delivery and shipment:

The software will be delivered when all required documents mentioned above are submitted and the user fee is paid. Included in delivery: program DVD/CD, authorization disk, dongle (hardlock)

Return of software:

I assure to return (by registered letter or parcel service) the provided dongle (hardlock) without being asked by the end of the agreed period of time. Otherwise, Dlubal Engineering Software will be forced to bill me the full price of the software.

Miscellaneous:

We would appreciate if you send us a copy of your thesis. If you agree, your project will be included into our online database presenting student and research projects created with Dlubal programs. For more information, see <http://www.dlubal.com/Graduation-Theses.aspx>.

I don't want to publish my thesis at www.dlubal.com.

Please find the following documents enclosed:

- a valid confirmation of enrollment (please attach original!)
- a copy of my valid card of identity or passport

 Location, date, signature

Order - Contract (duplicate for your records)
