CONTENT

- 01 In-App Scripting and Console
- O2 Difference between Webservice and Python Console
- 03 Model Export as Python Script
- 04 Examples

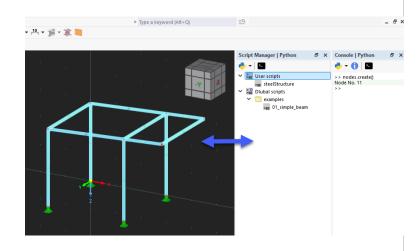

춨

What is In-App-Scripting and the Console?

- In-App-Scripting
 - Parametrization of Models
 - Automation of Tasks
 - Retrieval of Information
- Console
 - Creation of Geometry and Loading
 - Retrieval of Information
 - Usage of external Libraries

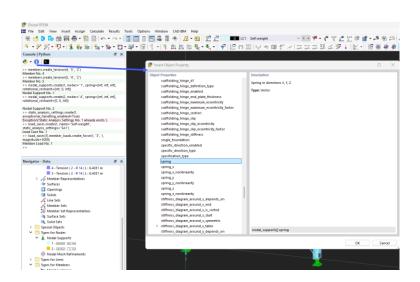

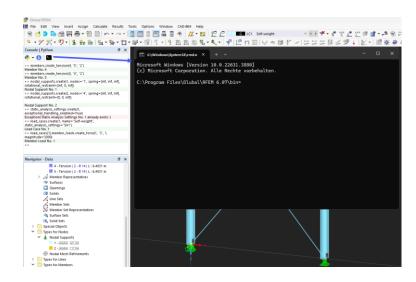

淤

Python Console

Information about commands and properties in info box

Installation of external libraries

춨

Webservice vs. Python Console

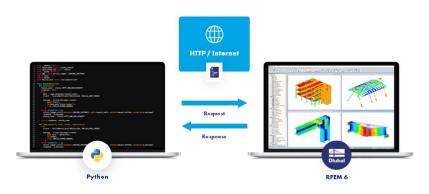

Webservice

- Communication via webserver
 - Internet connection needed

Python Console

- Direct communication
- Usable without internet connection
 - Different Syntax
- No programming environment needed

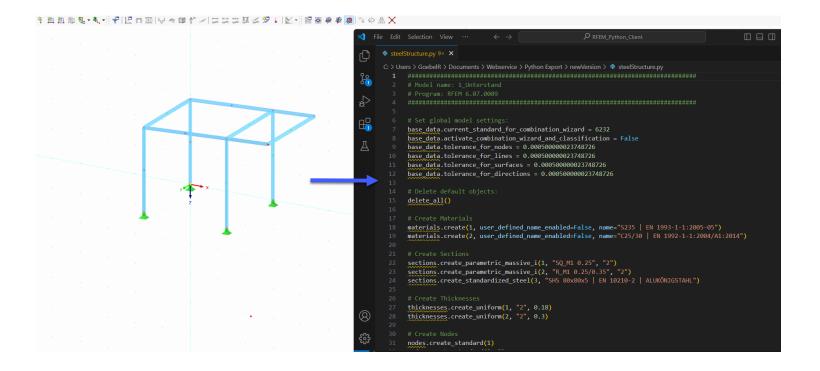

춨

Export to Python Script

$\overset{\sim}{\boxtimes}$

Geo-Zone Tool

Dlubal Software provides an online tool with snow, wind and seismic zone maps.

Dlubal

Cross-Section Properties

With this free online tool, you can select standardized sections from an extensive section library, define parametrized cross-sections and calculate its cross-section properties.

FAQs & Knowledge Base

Access frequently asked questions commonly submitted to our customer support team and view helpful tips and tricks articles to improve your work.

Models to Download

Download numerous example files here that will help you to get started and become familiar with the Dlubal programs.
