1	INTRODUCTION	2
2	FORM-FINDING	3
2.1	Theory	3
2.1.1	Physical Essence of Form-Finding	3
2.1.2	General Finite Element Approach	4
2.1.3	Force-Finding as Part of Form-Finding	5
2.1.4	Unstable Equilibrium Position of Elements Under Compression	5
2.2	Practice	6
2.2.1	Form-Finding of Mechanically Prestressed Membrane	6
2.2.2	Pneumatic Structures	12
2.2.3	Full Interaction with Supporting Structures	14
2.2.4	Shell Structures	22
2.2.5	Combined Structures	25
3	STRUCTURAL ANALYSIS	30
3.1	Theory	30
3.1.1	Principles of FEM Analysis	30
3.1.2	Nonlinear Analysis	31
3.1.3	Geometric Nonlinearity	31
3.1.4	Material Nonlinearity	33
3.2	Practice	34
3.2.1	Analysis of Membrane Structure	34
3.2.2	Warp/Weft Orientation	42
3.2.3	Pneumatic Structures	44
3.2.4	Analysis of Pneumatic Structure	46
4	GENERATION OF CUTTING PATTERNS	51
4.1	Theory	51
4.1.1	Cutting Lines	51
4.1.2	Flattening Methods	52
4.1.3	Construction Requirements	55
4.1.4	Compensation	55
4.2	Practice	57
4.2.1	Utilization of Different Cutting Lines	57
4.2.2	Evaluation of Pattern Quality	58
4.2.3	Structural Requirement	62
5	CONCLUSION	66
