# CONTENT

- 01 Calculation workflow
- 02 Modeling general cross-sections in RSECTION
- 03 Overview of structural system
- 04 Loads, imperfections and combinatorics
- 05 Design in Steel Design add-on
- 06 Result evaluation

# Calculation workflow

- 1) The draft standard EN 1993-1-3 includes a new stability design for biaxial bending in combination with axial force for single symmetric cross-sections.
- 2) No additional stability analysis required for structural analysis according to the second-order analysis, taking into account warping torsion and local and global imperfections.

# Free Online Services

## Geo-Zone Tool

Dlubal Software provides an online tool with snow, wind and seismic zone maps.

## Cross-Section Properties

With this free online tool, you can select standardized sections from an extensive section library, define parametrized cross-sections and calculate its cross-section properties.

## FAQs & Knowledge Base

Access frequently asked questions commonly submitted to our customer support team and view helpful tips and tricks articles to improve your work.

## Models to Download

Download numerous example files here that will help you to get started and become familiar with the Dlubal programs.

# Free Online Services

## Youtube Channel - Webinars, Videos

Videos and webinars about the structural engineering software.

## Webshop with Prices

Configure your individual program package and get all prices online!

## Trial Licenses

The best way how to learn using our programs is to simply test them for yourself. Download a 90-day free trial version of our structural analysis & design software.

We offer free support via email and chat
